

CUSTOM SOLUTIONS: CHEMICAL MANAGEMENT

With deep expertise in precision plastics manufacturing, we build custom solutions that combine the exact right materials, processes, and formats for your chemical management requirements.

GEMINI™ BARREL CABINET SYSTEM

The Gemini barrel cabinet system is a sturdier and safer solution to liquid chemicals management. Customization options range from single barrel storage to a multi-barrel configuration with integrated PLC for dosing applications.

All versions feature Apex' proprietary Freyr™ LED light strips, designed and sealed to provide critical process lighting – even when submerged, or exposed to vapor spray or corrosive gases.

CONFIGURATION OPTIONS:

- **Type:** Single Drum, Dual Drum, Dual Tote
- **PLC:** HMI, PLC controlled door latch, keyed door latch, simple door latch (no lock), stratus light, drum area lighting
- **Sensor Listing:** Fire/CO2, in-line flow, pressure, door, smoke, differential pressure, warnings/alerts, weight, containment level
- **Drum:** Drum filtering, drum conn. Holsters, full drum separation, drum separation interlock
- **Pump:** Manual valves, pneumatic valves
- **Plumbing:** Drain plumbing, 56 gallon "day" tank, sampling station, DI rinse gun
- **Door:** Glove ports, transparent, full seal, moisture barrier
